The John Nolen Award

The John Nolen medal is given to a meritorious individual or organization that has made significant contributions to the advancement of New Urbanist principles in the State of Florida. This major award provides the opportunity to recognize an outstanding body of work that upholds examples of performance and achievement to which all new Urbanists may aspire.

Sculpted by artist Roberto Santo and cast in bronze, the medal features the likeness of John Nolen. Nolen, the pioneering town planner during the early 20th century, whose work is still visible in some contemporary Florida towns, referred to the Sunshine State as a “laboratory for town and city building” and advocated settlements that showcase “the beauty of human work.”

The award is based on five benchmarks:

Innovation - Transferability - Quality
Implementation - Comprehensiveness

Charles A. Barrett Memorial Award

This prestigious honor, to be awarded every two years, is to recognize an individual with exemplary talents in traditional architectural and urban design.

Charles Barrett, who passed away in 1996, was a man of extraordinary passion and talent. During his tenure with Duany Plater-Zyberk and Company, Charles’s work defined the highest level of design discipline and beauty and became a trademark for the CNU in its formative years. Charles’s spirit lives on in his drawings, in the colleagues he influenced, and in the communities that were built because of his drawings. This award preserves the memory of the standard he set for others to emulate.
